

BACKWATER VALVES

Our fittings prevent backflow problems.

Pro-Line Fittings manufactures 4"- 24" IPS and 4"- 24" sewer Backwater Valves with a quick action flapper that checks backflow immediately. The access lids are removable for quick inspection and cleaning which is a real time saver.

Pro-Line also manufactures
Terminal Backwater Valves which
are used to prevent backflow at
the end of sewer lines or on the
overflow from a sanitary sewer
pumping station.
