4" AND 6" INJECTION MOLDED Inspection Chambers

WHY INSPECTION CHAMBERS?

- Reduce maintenance cost on calls from property owners claiming municipal blockage
- Allows for a visual inspection and camera insertion
- Quick access
- No need for coordination with homeowners for inspection

RETURN ON INVESTMENT

Pro-Line 4" & 6" IC's are molded to DR26 heavy wall.

- Allows easy identification of sewer locations.
- For a municipal blockage, access is easy for either flusher trucks or rodder crews to clean from the IC to the sewer main.
- The initial expense of the IC installation is borne during development. The elimination of a single claim can more than offset the cost of many ICs.

Locking Lid & Collar

FEATURES & BENEFITS

- Keeps lines secure from debris being thrown down the riser
- Colour coded for storm and sanitary specifications
- Sealed with an o-ring gasket
- Larger flat washer to allow for easy location by a metal detector
- Only authorized personnel can access the internals of the IC

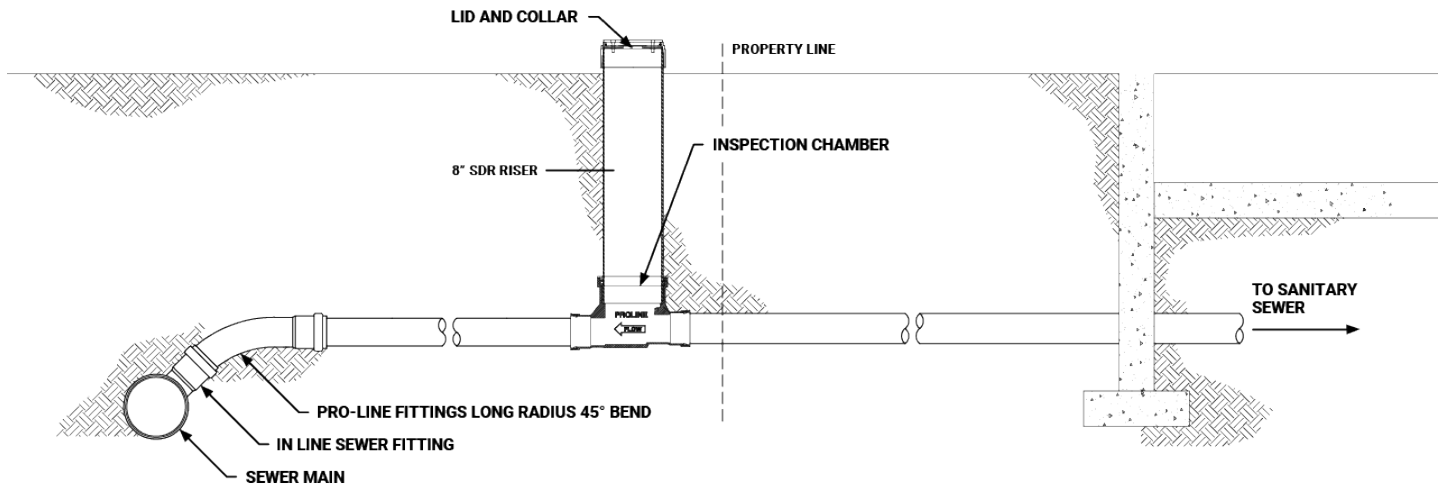

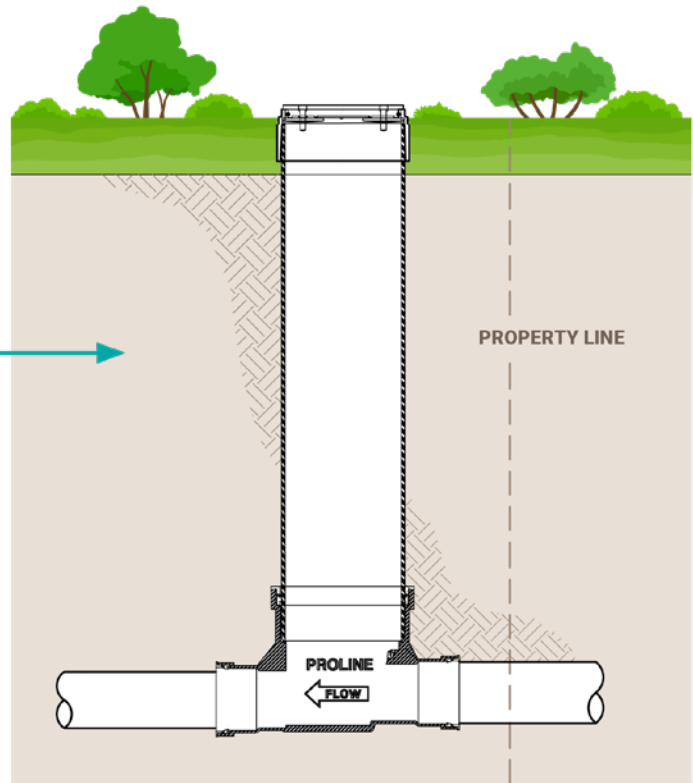

Flaps & Plugs

Pro-Line manufactures flaps and plugs for both the 4 and 6" Inspection Chambers.
